

## Case Study – UK Police Forces

### Brief

Working in association with the UK police force crime prevention officers we were requested to provide a series of ongoing lectures to the CRO's at their quarterly training sessions.

### Approach

Training programmes were devised to provide the maximum amount of information in the limited time available to us. Topics covered included 'top tips' for home and business users to minimise their IT security risk as well as some in depth training into the nature of the high tech crime risks and methods of attack. Training has also been provided on what to do in the event of discovering a high tech crime.

### Outcome

Our ongoing lectures enable the countries CRO's to understand high tech crime issues and give basic yet sound advice to the public and private sectors.
